# Module 8: Policy coherence for sustainable development

## Environmental SDG Indicators e-learning course

**Name:** Babul Deb

**Date:** November 22, 2023

### **About the module:**

This module explains the concept of policy coherence, its origins and relationship to the Sustainable Development Goals. It discusses its relevance and importance to sustainable development and to Sustainable Development Partnerships. It provides the methodology and limitations for the computation of the SDG Indicator 17.14.1, its description, rationale and means of verification for 8 themes used to measure policy coherence. The module is supported by the case study from Latvia.

### **Learning objectives:**

Following the completion of the module, participants will be able to:

1. Discuss the importance of policy coherence for sustainable development and achievement of the 2030 Agenda and its SDGs;
2. Explain the rationale of measuring policy coherence under the SDG Indicator 17.14.1;
3. Describe the concepts and methods of the SDG Indicator 17.14.1
4. Recognize main means (8 themes of the methodology) by which the above indicator can help monitor the implementation of policy coherence.
